

ERRATUM

EPH RECEPTOR SIGNALLING CASTS A WIDE NET ON CELL BEHAVIOUR

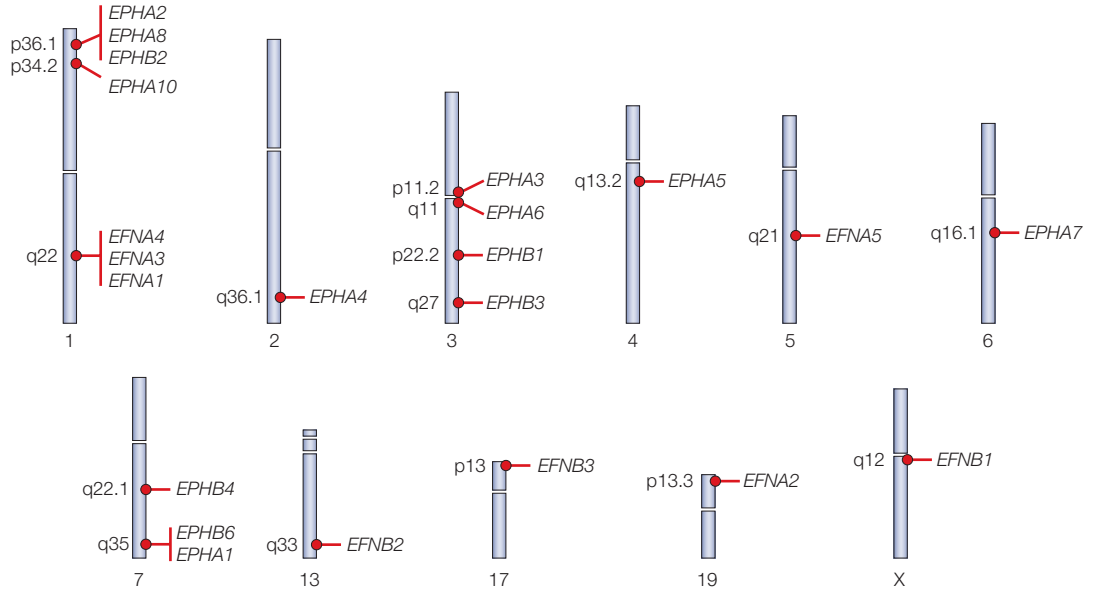

Elena B. Pasquale

Nature Rev. Mol. Cell Biol. **6**, 462–475 (2005)

On page 472 of the article, in Figure 6, q27 on chromosome 3 should indicate the position of *EPHB3*, not *EPHB6*. In addition, the axons in parts **b** and **c** of Box 2 should be purple, not blue, to indicate the co-expression of ephrin-As and EphA receptors.

Please see the corrected versions below:

Figure 6:

Box 2 (a–c only):

Anterior–posterior mapping
